

## Gerould's Healthcare Center's Vision Statement

"Gerould's Healthcare Center's Vision is to remain a long term, dedicated participant within the communities in which we serve, striving to communicate and further educate communities about the importance of wellness, safety, and the healthcare needs of all people – including seniors, people with disabilities and their loved ones – enabling them to remain in their home as long as possible."

"Let our family take care  
of yours."

## About Us

Our patients can count on us to be their first source for medical equipment. We offer a variety of home healthcare products, as well as a complete line of durable medical equipment such as compression stockings, orthopedic supports and aids for daily living.

We answer questions, share valuable educational expertise, teach, and offer advice on medical supplies. Our certified fitters will be sure you are properly fit for any product needing a fitting. You and your business are important to us so we will do everything we can to ensure that any product you purchase is a product that is right for you.

## Our Products

Gerould's Healthcare Center offers a wide selection of medical aids, supplies, and equipment encompassing a broad range of needs including:

- Diabetic Shoes/Socks
- Orthopedic Bracing
- Seat lift chairs
- Power Scooters/Wheelchairs
- Ambulatory Products
- Hospital Beds
- Walk-in Shower/Tub
- CPAP/BIPAP/Oxygen and Supplies

Stop in or call and ask one of our Home Medical Equipment Specialists for more information!

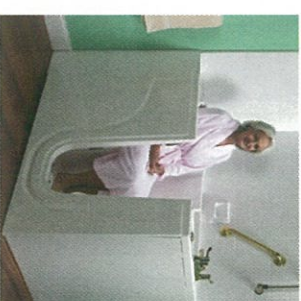

We are excited to announce that we now carry **OXYGEN!**

## Professional Services

### Independent Living Solutions

All of our services are centered around helping clients maintain independence and quality of life while ensuring their safety and wellbeing.

### Ask us about our new division - Community Care Health Solutions (CCHS)

Through patient education, therapy awareness, and home safety assessments, our licensed respiratory therapists, pharmacists, rehab professionals, and home safety advisors seek to improve patient compliance and health outcomes. This will allow our patients the independence to live the way they choose, while avoiding unnecessary emergency room visits and hospital readmissions.
